2012 Goal Report

Edison K-8

This report provides you with an analysis of the goals that teachers at your school created for this evaluation cycle. It may be used to identify trends in areas that teachers at your school are working to develop, which can help inform professional development and support.

All educators were required to create at least one professional practice goal and one student learning goal, and some submitted additional goals. For professional practice goals, educators had the option to tag the goal to one or more Indicators on the Rubric of Effective Teaching. Please use the Rubric overview below to interpret the professional practice goal graphs provided in this report.

For student learning goals, educators had the option to tag the goal to one or more areas within the categories of Assessment, Subgroup (of students), and Subject.

			2. Reliability and
			Responsibility

Figure 1. Percentage of Teachers at Your School that Tagged Professional Practice Goals to Each Standard on the Rubric of Effective Teaching

What this graph shows: This graph shows the percentage of teachers at your school that tagged at least one professional practice goal to each Standard on the Rubric of Effective Teaching.

How to use this graph: This graph provides a broad overview of which areas teachers at your school have focused on for professional practice goals. Is there one or more standards that stand out with a higher percentage than the others? This may be a good area for focusing support.

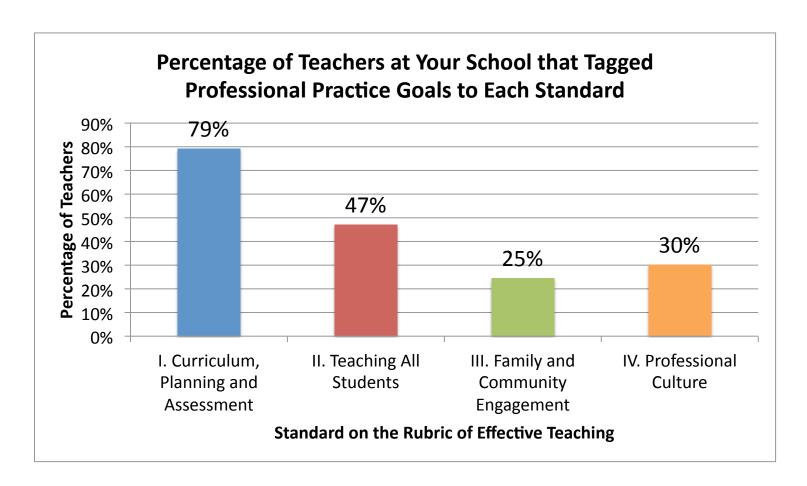

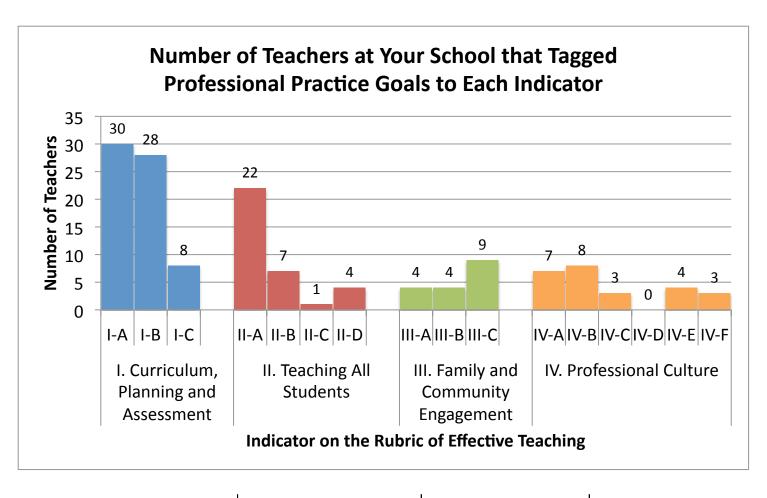

Figure 2. Number of Teachers at Your School that Tagged Professional Practice Goals to Each Indicator on the Rubric of Effective Teaching

What this graph shows: Looking within each Standard, this graph shows the number of educators that tagged at least one professional pracitic goal to each Indicator on the Rubric of Effective Teaching. Indicator names are listed below.

How to use this graph: This graph provides you with a more detailed view of specific areas that teachers at your school have focused on for professional practice goals. Are there particular indicators that many teachers have identified? It may be useful to form teams around these areas to encourage collaboration.

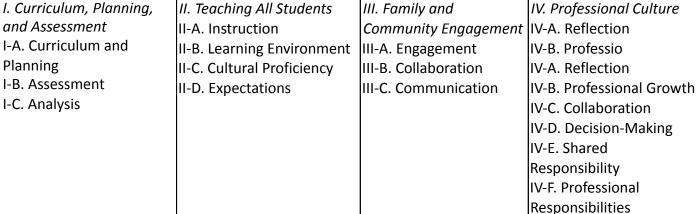

Figure 3. Which Teachers Tagged Each Indicator to Professional Practice Goals

What this table shows: This table allows you to see which teachers tagged each indicator. If there is an "x" in the box under the indicator, then the teacher tagged that indicator in at least one professional practice goal.

How to use this table: This view allows you to see trends in who is working on each area and to promote collaboration between those teachers.

Figure 4. Areas that Teachers at Your School Tagged to Student Learning Goals

What this graph shows: This graph shows the areas that teachers tagged to student learning goals within the three categories of Assessment, Subgroup, and Subject. Teachers may have tagged multiple areas for each goal.

How to use this graph: This graph can help determine teams of teachers that have created goals around specific areas. Is there one particular area in which most teachers at your school are focusing? This could be a good area to create Professional Development around.

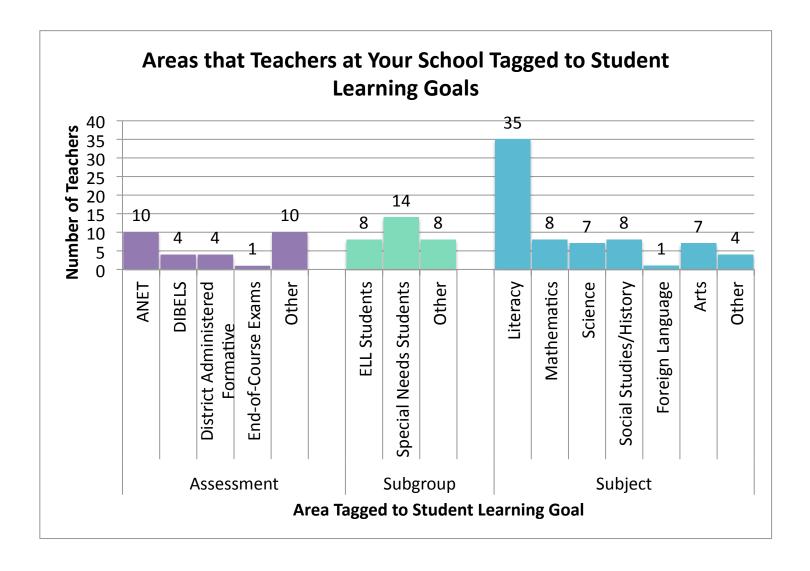

Figure 5. Which Teachers Tagged Each Area to Student Learning Goals.

What this table shows: This table allows you to see which teachers tagged each area. If there is an "x" in the box under the area, then the teacher tagged that area in at least one student learning goal.

How to use this table: This view allows you to see trends in who is working on each area and to promote collaboration between those teachers.
